

AI-BOOST

Delivering the next level of European
AI Open competitions

AI-BOOST is a prominent **open challenge prize programme** that will serve as a benchmark for the **European AI community**

Project Goals and Objectives

Create a unique sound methodology capable of defining high social impact AI challenges

Attract outstanding talent and the best research teams to tackle AI challenges

Engage private and public sponsors capable of providing funding, attractive rewards and expertise

Create an AI community to foster interaction among all relevant stakeholders

Create a highly replicable and attractive AI open innovation competition capable of leading breakthrough technologies and solutions

Provide access to infrastructure and expert knowledge and promote its adoption through effective training and troubleshooting during the challenges' implementation

AI-BOOST wants to achieve several **significant impacts**, with its central objectives focused on establishing and managing **highly scalable AI open innovation competitions**.

These competitions are designed to attract **the best teams** from across the European Union and Associated Countries, **fostering scientific advancements in critical AI domains**.
